

Memorialization of Mass Atrocities in the Digital Age

Edit

Location: CO493, room 103

Time: 11:35 am - 12:50 pm, T Th

Instructor: Prof. Eve Zucker

Office Hours: Tuesdays 1:00-2:30, Anthropology Dept, 10 Sachem and by appointment

Email: eve.zucker@yale.edu

About the Instructor

Eve Zucker is a Lecturer in the Department of Anthropology. She co-edited the 2020 volume *Mass Violence and Memory in the Digital Age: Memorialization Unmoored* (Palgrave), which stemmed from a similarly titled symposium held at Yale in 2018. Her work centers on memory and social recovery in the aftermath of mass violence, particularly pertaining to the Cambodian Genocide, Southeast Asia, and the Holocaust. Her interests include digital anthropology, morality/moral order, imagination, and extreme social change.

Course Description

This seminar explores the means, methods, and meaning of digitization of memorialization of mass violence. Along the way, we will address a series of questions, including:

- How has digitization changed the way in which violent pasts are represented, shared, and remembered?
- How do the means of memorialization influence what gets remembered?
- What advantages -- and what risks -- does digital media pose for the project of memorialization?
- How can digital technology be used -- and perhaps misused -- in the service of memorialization?
- In what directions -- and to what consequences -- can we expect memorialization to move in the future, in light of technological change?
- How do digital technologies in relation to memory of mass atrocities contribute to both the creation of communities of memory and/or social division?

The course is premised on the notion that memorialization is a key project that allows individuals, communities, and societies to process episodes of mass violence in their own recent -- or even distant -- pasts. Each week will focus on a different medium of memorialization, reviewing examples of the medium and discussing its implications across a variety of dimensions -- i.e., the personal, societal, political, etc.

How -- and, for that matter, why -- do we remember violence in our pasts? This seminar examines the ways in which groups, communities and societies memorialize mass violence and especially mass atrocities (i.e., widespread and systematic attacks against civilian populations), as well as motivations behind the impulse to memorialize (or not, as sometimes pasts are hidden or forgotten). The seminar focuses, in particular, in how digital technology is changing the way mass violence is memorialized, and some of the effects this may have on social practices and understandings.

Note on Course Content: The topics covered in the course are not always easy intellectually or emotionally. Given we are studying the memory of mass atrocities and genocide some of the material we cover in the course is disturbing.

Course Format

This is a seminar course and students are expected to contribute regularly to class discussions. Readings and assignments for a given class day must be completed before class. The format will be a combination of class-wide and small-group discussions as well as short lectures. Students will also give presentations to the class and we will occasionally have guest speakers join us to share their work. There may also be opportunities for experiential learning through field trips.

In addition to the in-person activities, a page is maintained on canvas with news, events, and resources relevant to the class. Students are encouraged to contribute.

Enrollment Cap, Selection Process, & Notification (if applicable)

Enrollment is handled through the First Year Seminar Program. The capacity is 15 students.

Prerequisites

None.

Required Course Materials

Readings and audio-visual materials will be posted online. There is no required textbook.

Assessments and Grading

Student work will involve weekly participation in discussions, two reading response papers, an in-class presentation on weekly readings/viewings, a prospectus and annotated bibliography for the final project, a final project presentation, and a final paper.

The grading breakdown is as follows:

- Weekly discussion participation: 15%
- In-class presentation 20%
- Two reading response/reflection papers 20% (10% each)
- Tentative prospectus for final project 5%
- Final project annotated bibliography 5%
- Final project presentation 5%
- Final project 30%

Response/Reflection Essays: Students are asked to provide 2 short (500-600 word) response essays discussing all the readings for a chosen day, highlighting their main arguments and the student's response. (Critical analysis preferred to mere summation). The **first response essay** is to be submitted for a session of your choice **during weeks 2-6**, providing the response corresponds to the topic of the session. The **second response essay** must be given between **weeks 7-12**. To ensure that everyone does not do their response essays for the same topics, we will create a sign-up on the first or second week of class.

Presentations: Students will be asked to present a summary of the readings (and other materials) assigned for a particular day, along with their reflections on those readings/materials. Presentations should be no longer than 10 minutes long and should conclude with 2 or 3 questions to be asked of the class to stimulate further discussion. Presentations will begin in the Thursday of the second week, and there will be a sign-up sheet open in week 1. Please submit your PowerPoint prior to class on the day you are presenting.

Final Paper: You are required to write a final paper of about 2500-3000 words (or 10-12 pages double-spaced with 12 pt. font and 1-inch margins). The paper should focus on a topic or theme raised in the class and should draw from readings from the class, while also including additional sources.

The paper topic, abstract, and preliminary bibliography should be submitted in writing giving a preliminary title, brief summary of the project, and a partial bibliography midway

through the semester. The idea is that you begin to formulate your ideas about your final paper project and consider which sources you might use. I strongly encourage students to meet with me during office hours to discuss the final paper project as it develops. In the event that you decide your paper is not feasible after having submitted this assignment or that you wish to pursue another topic, I ask that you notify me of this change and meet with me to discuss the change.

Final Paper Presentation: You will present a summary of your paper project to the class in the final weeks of the course. The idea of this presentation is that is an opportunity to share with the class what you have been working on at receive feedback that might be helpful in completing the project.

Class Participation: One of the aims of this course is to develop new insights and understandings through engaged dialogue on the course topics. To reap the maximum benefit of the course, it is important that all students contribute by sharing their questions, understandings and insights with one another, by listening to each other, and by engaging in creative and constructive dialogue. You will only receive full credit for class participation if you are present in class, on time, well-prepared to discuss the readings, and actively participating in class (meaning, participating in class discussions).

Policy on Timely Submission of Assignments

Students must upload papers to canvas on time before the beginning of class on the date the assignment is due. Papers should be double-spaced, using standard 12-point font, with 1-inch margins. Unexcused late papers will not receive anything higher than a "B". Students anticipating the need for an extension must forewarn the instructor at least one week in advance. Assignments should be uploaded to Canvas.

Statement on Academic Integrity

All work that you submit in the course of completing the class requirements must be your own. The use of others' work as if it were one's own constitutes plagiarism. This includes essays written by AI programs such as ChatGPT. Please familiarize yourself with the appropriate standards and techniques for citing all sources that are used in the work you submit. Failure to adhere to appropriate citation standards may result in a grade reduction. Flagrant violations could lead to Yale's disciplinary process.

Diversity, Equity, Inclusion, & Belonging

This course is a learning community that values diversity, inclusion, equity, and belonging. As a community, we encourage differences in views, support one another, and encourage supportive, empathetic, and respectful communication. Engaging with differing beliefs and backgrounds is an opportunity to expand our knowledge and understanding of each other, ourselves, and the world.

Accessibility

Inclusion is a core value of my course. Please let me know immediately if you are having difficulties with any of the course activities or assignments, or if there is anything you feel is hindering your ability to participate fully in the course. You may also wish to visit the [Student Accessibility Services](#)[Links to an external site.](#). I encourage all students to take advantage of Yale's additional resources that support student learning including the [Writing Center](#)[Links to an external site.](#), [Residential College Tutors](#)[Links to an external site.](#), and [Academic Strategies](#)[Links to an external site.](#).

Syllabus

PLEASE CHECK THIS SYLLABUS REGULARLY FOR UPDATES AS READINGS AND MATERIALS MAY BE ADJUSTED THROUGHOUT THE COURSE

Jan 17 Introduction: Digital Memorialization

Reading:

- Anderson, Benedict, 'The Origin of National Consciousness' in *Imagined Communities*, ch. 3, pp. 37-46. (Course Readings)

Jan 19 Memorialization and Monuments

Class Activity:

- Listen: Truong, Angeline [Myth – Consequence Forum](#)[Links to an external site.](#)

Readings:

- Watch: Maya Lin: A Strong Clear Vision (Course Reserves)
- Read: NYT article "[A Korean Wall of Remembrance Set Hundreds of Errors in Stone](#)[Links to an external site.](#)" by By Dave Philipps
Jan. 9, 2023. Note: here is the [link](#)[Links to an external site.](#) for the website they refer to in the article
- Read: Kugelmass, Jack. "Missions to the Past: Poland in Contemporary Jewish Thought and Deed" in *Tense Past*, Antze and Lambek, 1996. (Course Readings)

Further suggested reading:
